REPLY TO  
ATTN OF: NCPCM  
SUBJECT: Master Microfilm

National Personnel Records Center  
(Civilian Personnel Records)  
111 Winnebago Street  
St. Louis, MO 63118

The following set of SF-135's refer to the 638 carton shipment of Direct Duplicating Intermediate Film created under contract No. GS-006-29188 by the Eastman-Kodak Company. The film is in the form of 1,000 ft. reels, with each reel(s) stored inside of a metal reel can, and in turn approximately 10 of these metal reel cans are placed in one carton.

This film covers several subjects, the main portion consisting of Army/Air Corps, and Air Force Morning Reports from WWI, WWII, and extending through 1968. Also covered are Sick Reports, Rosters, Casualty Reports, and several other miscellaneous subjects as listed on the SF-135's.

The carton numbers appearing in the left-hand column correspond to a beginning and ending reel box number that will be found within that particular carton. In some cases item numbers are also shown, these provide a rough boundary for reference within a specific year or month. Each subject (e.g. MORNING REPORTS, or SICK REPORTS) being indicated by a special heading, and when appropriate sub-headings indicating months, years, etc. are utilized.

St. Louis, MO 63118

The following set of SF-135's gives a location guide, by cabinet number, of the 100 ft. Diazo copies located at MPRC, 9700 Page Blvd., St. Louis, Mo.

On these forms there will appear handwritten notations to the immediate right of some of the groups of reel box numbers. These handwritten numbers indicate reels of film that were not duplicated in numeric order with the rest of the reels. The majority of these reels will appear in a special group designated as OZALID, located at the end of this set of SF-135's. One-Thousand foot Direct Duplicating Reels were created for this special group of out-of-sequence reels. If a desired reel number occurring as a handwritten notation does not in turn appear within the OZALID group it should be assumed that there will not be a one-thousand foot reel containing that particular 100 foot reel. However, it should be noted that because a reel number fails to appear in the OZALID group, that does not necessarily indicate that it would not appear as a 100 foot reel in the form of an original and/or a diazo copy.
