TOP SECRET
HIGOT

HEADQUARTERS 1ST ENGINEER SPECIAL BRIGADE
A.P.O. 230 U.S. ARMY

27 May 1944

PLAN FOR
33rd CHEMICAL DECONTAMINATION COMPANY
TO CARRY OUT ANY ASSIGNED SMOKE MISSION

1. Immediately upon arrival on the far shore the Chemical Company will send one officer and one enlisted man to the CP of the AA Defense Command. After making contact with AA Defense Command the officer will return to the Company and the enlisted man will remain to act as liaison between AA Defense Command and the Company.
2. AA Defense Command will clear any request for smoke through Brigade Hq so that Brigade may have the opportunity of vetoing it, should they feel smoke would interfere with normal beach operations.
3. As soon as the tactical situation permits, an officer from the Chemical Decontamination Company and the reconnaissance section will reconnoiter beach maintenance areas and will select points for placing fog generators so as to cover any point in area, either with an offshore or cross shore wind.
4. Liaison will be established on D day between the Brigade Chemical Officer and the Chemical Decontamination Company. The Brigade Chemical Officer will check S2 and AA weather reports each day so that the company can be informed as to any shift in wind direction or other weather conditions that may interfere with smoke mission.
5. Upon the assignment of a fog mission the company less personnel necessary to operate GWS dump will reorganize into a Hq Platoon, three fog generator platoons consisting of two operating sections and one supply and maintenance section each.
6. Additional trucks necessary to maintain supply of fog oil and petrol to generator line will be drawn from brigade.
7. Existing communication including those at AA gun emplacements will be utilized to coordinate the proper employment of the smoke screen.
8. After D+6 when 24 additional generators become available, a complete generator line will be established around entire area and smoke can be produced in any or all parts of Brigade area on call.

I. Lt. Wright and Cpl. Daniels will report to Capt. McStay at Brigade C.P. upon arrival at far shore.

II. Lt. Donnelly and Cp. Vona will establish Liaison with AAA C.P.

III. The following men will operate maintenance Area CWS Dump:
