Ross

Mr. Siddall, before you post the garbage of Russell Ross with his lies and false claims of bravado perhaps you should have done some research with the men who were there. You should also check Ross' army records that clearly show he was NOT in the Ia Drang nor Albany.

He was however under FBI investigation for stalking and threatening reporters.

Your claim that you spoke with CSM Plumley on Skype is simply a flat out lie. CSM Plumley had no internet, did not give interviews, and the closest thing he had to high tech was a rotary dial phone. Mrs. Plumley would never have permitted anything else.

You sir are a liar. Worse you are disparaging honorable men based on the words of a person that everyone who knows him knows he is under psychiatric care. Now I feel bad for Ross. He is a sick man. But I have nothing but contempt for you.

And I am a VN vet. 3 years volunteer working with rape victims and children of rape victims. I can say this. YOU are raping the honor of those who served.
